Hilton Worldwide, Inc. - Climate Change 2018

C0. Introduction

C0.1

(C0.1) Give a general description and introduction to your organization.

Hilton is one of the largest and fastest growing hospitality companies in the world, with 5,284 properties comprising 856,115 rooms in 105 countries and territories as of December 31, 2017. Managed and franchised hotels included in this disclosure include: our luxury and lifestyle hotel brands, Waldorf Astoria Hotels & Resorts, Conrad Hotels & Resorts and Canopy by Hilton; our full service hotel brands, Hilton Hotels & Resorts, Curio - A Collection by Hilton, DoubleTree by Hilton, Tapestry Collection by Hilton and Embassy Suites by Hilton; our focused service hotel brands, Hilton Garden Inn, Hampton by Hilton, Tru by Hilton, Homewood Suites by Hilton and Home2 Suites by Hilton. In addition to our current hotel portfolio, we are focused on the growth of our business through expanding our share of the global lodging industry through our development pipeline. During the year ending December 31, 2017, nearly 108,000 new rooms were approved for development, and we opened 399 hotels consisting of over 59,000 rooms.

We depend on our long-term hotel management and franchise contracts with third-party owners and franchisees for the majority of our fee revenues. The management and franchise segment includes all of the hotels we manage for third-party owners, as well as all franchised hotels owned and managed by others. As of December 31, 2017, there was a total of 729 hotels managed by Hilton within the owned and managed global regions ("managed hotels"). Out of these hotels, Hilton has an ownership interest in 73 hotels (10% owned, joint venture, leased) and a 100% controlling interest in only four hotels, accounting for less than 1% of the total managed portfolio under Hilton's operational control ("Direct Operations"). Franchised properties, which are controlled by Hilton's development and operating standards for the respective Brands, account for over 73% of our global portfolio by total room count. Given their significance to Hilton's business model, responses that are relevant to franchised hotels are reported as Other Value Chain.

Our 2018 CDP Reporting Boundary is Operational Control, defined as companies, entities or groups over which operational control is exercised.   It is important to note that this represents a change from last year's reporting where Hilton has expanded its reporting boundary to include water consumption data for both managed and franchised hotels. This change was made in an effort to ensure consistency with our DJSI reporting and annual sustainability results published for our global portfolio. However, this caused other reporting inconsistencies and issues with the level of operational control and detailed data available for our franchised properties. Therefore, we have returned to the Operational Control Boundary for CDP reporting on Climate Change, Water and Forests to ensure consistency.   However, please note that Hilton's corporate responsibility strategy, along with LightStay requirements for measurement and improvement in energy efficiency and emissions reduction, extend to all managed and franchised hotels globally.

Hilton has integrated energy and climate-related issues into our business objectives for years through our continual focus on improving the environmental performance of our hotels and driving responsible travel and tourism across our industry. We are serious about our role in helping the international community reach the UN Sustainable Development Goals (SDGs) through our global hotel operations and supply chain footprint. Our corporate responsibility strategy, Travel with Purpose, drives us to think and act in ways that will maximize our contributions to help meet these important global goals. In this spirit, we have united our 380,000 Team Members along with our owners, partners and communities in more than 100 countries around our corporate responsibility strategy and shared goals.

Earlier this year, we released our new Travel with Purpose long-term commitment to double our social impact and cut our environmental footprint in half by 2030. One of the key targets underpinning these goals is our new science-based targets (SBTs), demonstrating our commitment to reducing our carbon emissions in line with the stipulations of the Paris Agreement. We believe that climate change is one of the biggest threats to business today, and we are proud to be the first major hotel company to have our SBTs approved by the Science Based Targets initiative (SBTi).

C0.2

(C0.2) State the start and end date of the year for which you are reporting data.

	Start date	End date	Indicate if you are providing emissions data for past reporting years	Select the number of past reporting years you will be providing emissions data for
Row 1	January 1 2017	December 31 2017	No	<Not Applicable>
Row 2	<Not Applicable>	<Not Applicable>	<Not Applicable>	<Not Applicable>
Row 3	<Not Applicable>	<Not Applicable>	<Not Applicable>	<Not Applicable>
Row 4	<Not Applicable>	<Not Applicable>	<Not Applicable>	<Not Applicable>

C0.3

(C0.3) Select the countries/regions for which you will be supplying data.
Other, please specify (Americas, Asia Pacific, EMEA)

C0.4

(C0.4) Select the currency used for all financial information disclosed throughout your response.
USD

C0.5

(C0.5) Select the option that describes the reporting boundary for which climate-related impacts on your business are being reported. Note that this option should align with your consolidation approach to your Scope 1 and Scope 2 greenhouse gas inventory.
Operational control

C1. Governance

C1.1

(C1.1) Is there board-level oversight of climate-related issues within your organization?
Yes

C1.1a

(C1.1a) Identify the position(s) of the individual(s) on the board with responsibility for climate-related issues.

Position of individual(s)	Please explain
Chief Executive Officer (CEO)	Our President and CEO is the member of Hilton's Board of Directors with responsibility for climate-related issues and decisions. Hilton's Executive Vice President, Corporate Affairs oversees the Corporate Responsibility department, which is responsible for the company's sustainability strategy, including Hilton's strategy for addressing climate change. The EVP of Corporate Affairs reports directly to Hilton's President and CEO, who is the only company executive on Hilton's Board of Directors. Our Board receives periodic updates from our CEO and our EVP, Corporate Affairs on the Company's corporate responsibility strategy and initiatives.

C1.1b

(C1.1b) Provide further details on the board's oversight of climate-related issues.

Frequency with which climate-related issues are a scheduled agenda item	Governance mechanisms into which climate-related issues are integrated	Please explain
Scheduled – some meetings	Reviewing and guiding major plans of action Reviewing and guiding risk management policies Reviewing and guiding annual budgets Reviewing and guiding business plans Monitoring and overseeing progress against goals and targets for addressing climate-related issues	The Board of Directors has overall responsibility for risk oversight, which includes understanding (1) material risks, (2) management steps to address these risks and (3) appropriate levels of risk of our company. As part of regular Board and committee meetings, the Board of Directors is responsible for general oversight of executives' management of risks relevant to the Company. Hilton's Global Risk Management team regularly assesses our sensitivity to changes in risk profiles across a series of prioritized financial and non-financial risks. This analysis helps us to inform our Board of Directors as they assess management's risk tolerance levels and determine what constitutes an appropriate level of risk for the company. Additionally, our Board receives periodic updates from our CEO and EVP, Corporate Affairs on the Company's corporate responsibility strategy and initiatives. Mid-year and annual reports are also provided to the Executive Committee, including our CEO, highlighting key sustainability programs and partnerships and the direct results of these investments.

C1.2

(C1.2) Below board-level, provide the highest-level management position(s) or committee(s) with responsibility for climate-related issues.

Name of the position(s) and/or committee(s)	Responsibility	Frequency of reporting to the board on climate-related issues
Other C-Suite Officer, please specify (EVP, Corporate Affairs)	Both assessing and managing climate-related risks and opportunities	Annually

C1.2a

(C1.2a) Describe where in the organizational structure this/these position(s) and/or committees lie, what their associated responsibilities are, and how climate-related issues are monitored.

Organizational structure: Hilton's Corporate Responsibility department reports to the Executive Vice President of Corporate Affairs, who is the Hilton leader below Board-level with the highest level of management responsibility for climate change. The EVP of Corporate Affairs reports to the President and CEO. The Corporate Responsibility department is led by the Chief Sustainability Officer (VP, Corporate Responsibility).

Responsibilities: The Corporate Responsibility department is responsible for managing Travel with Purpose, our corporate responsibility strategy, which focuses on the environmental, social and governance issues that directly affect the business.

How climate-related issues are monitored: Using our LightStay platform, Hilton's Corporate Responsibility team support our company's evaluation of climate change risks on an annual basis. In 2017, we completed a portfolio-wide analysis on our climate impact against future growth projections leading to 2050. This analysis was used to develop Hilton's new science-based targets and inform our long-term climate change strategy. Hilton also monitors climate-related issues on a global and regional basis through our annual water risk assessment, using the WWF Water Risk Filter tool. Updates on Hilton's Corporate Responsibility activities, including climate-related issues, are provided regularly to the Board. Mid-year and annual reports are also provided to the Executive Committee, highlighting key sustainability programs, partnerships and the direct results of these investments.

C1.3

(C1.3) Do you provide incentives for the management of climate-related issues, including the attainment of targets?
Yes

C1.3a

(C1.3a) Provide further details on the incentives provided for the management of climate-related issues.

Who is entitled to benefit from these incentives?
Chief Sustainability Officer (CSO)

Types of incentives
Monetary reward

Activity incentivized
Emissions reduction target

Comment
Bonus potential for the VP of Corporate Responsibility is tied to the overall management of climate changes issues including validation, certification and reporting of annual efforts and results around energy, water and waste, setting company's sustainability strategy and goals (annual and long term, including utility efficiencies), hotels' performance metrics and measurement as well as tools and resources, employee awareness and engagement, and partnership implementation and results.

Who is entitled to benefit from these incentives?
Other, please specify (Vice President, Engineering)

Types of incentives
Monetary reward

Activity incentivized
Energy reduction target

Comment

Bonus potential for the regional Vice Presidents of Engineering (Property Operations) is tied to the attainment of sustainability goals, including reduction in energy consumption for hotel operations in their respective regions. Performance indicators are defined based on previous year consumption for each region. Measures used are hotels' energy total spend and use (total kBtus). Additionally, Property Operations in certain regions are also incentivized based on reduction of carbon emissions. Employees reporting into these positions whose responsibilities include climate changes issues (e.g. Regional Directors of Property Operations, Managers of Sustainability, Manager of Energy) are also financially incentivized based on some or all of the goals mentioned above. The energy reduction goals that the VPs of Property Operations are held accountable for are aligned with the energy reductions require for Hilton to achieve its science-based targets.

Who is entitled to benefit from these incentives?

Environment/Sustainability manager

Types of incentives

Recognition (non-monetary)

Activity incentivized

Efficiency project

Comment

All full service and luxury branded hotels are required to have a committee of employees responsible for supporting and enhancing sustainability initiatives, reduction of utility and efficient operational performance, as well as employee engagement and community involvement. Every year, these committees are recognized based on their utility efficiency performance, their energy, water and/or waste efficiency improvement projects, employee and guest awareness and engagement projects, as well as community involvement. While these committees are not required in focus service hotels, many of these hotels will still have such a committee or person handling the initiatives mentioned above. These brands will also provide sustainability related awards based on utility efficiency results and improvement projects. The hotels, their General Managers and all staff are recognized with these awards.

Who is entitled to benefit from these incentives?

Facilities manager

Types of incentives

Monetary reward

Activity incentivized

Energy reduction target

Comment

Bonus potential for hotel Directors of Property Operations/Engineering is tied to the attainment of sustainability goals, including reduction in energy consumption and carbon emissions (for certain regions) for their hotel's respective operation. Performance indicators are defined based on previous year consumption for each region. Measures used are hotels' energy intensity (kBTU per square foot) and CO_2e in pounds per square foot. In addition, regional programs are in place that reward engineering teams with the best overall sustainability results, including energy year-over-year consumption reductions, waste efforts, sustainability related training, etc.

Who is entitled to benefit from these incentives?

All employees

Types of incentives

Monetary reward

Activity incentivized

Behavior change related indicator

Comment

Hotels, their General Managers and staff are recognized throughout the calendar year for sustainability-related best practices, as follows: (1) Hotel teams are eligible for Travel with Purpose Action Grants, a program designed to invest in our hotels' ideas to address local issues impacting their communities. In 2017, a total of 129 Action Grants totaling $397,000 were awarded to support innovative, local approaches that address social and environmental challenges; (2) Global Week of Service is our annual, global celebration in which all hotels and offices around the world are encouraged to coordinate or participate in hands-on volunteer projects. In 2017, team members from 87 countries volunteered 267,355 hours, with a selection of winning projects receiving a monetary reward; (3) Our managed hotels in Europe, Middle East and Africa are eligible to participate in the annual Driving Value competition where hotels compete to demonstrate the highest reductions in energy and water savings. All employees from the winning hotels receive an award for their achievements.

C2. Risks and opportunities

C2.1

(C2.1) Describe what your organization considers to be short-, medium- and long-term horizons.

	From (years)	To (years)	Comment
Short-term	0	3	We consider the short-term to include the present day through the next three years.
Medium-term	3	10	We consider medium-term to consist of 3-10 years in the future.
Long-term	10	30	We consider a 10-30 year time period to be our long-term horizon.

C2.2

(C2.2) Select the option that best describes how your organization's processes for identifying, assessing, and managing climate-related issues are integrated into your overall risk management.

Integrated into multi-disciplinary company-wide risk identification, assessment, and management processes

C2.2a

(C2.2a) Select the options that best describe your organization's frequency and time horizon for identifying and assessing climate-related risks.

	Frequency of monitoring	How far into the future are risks considered?	Comment
Row 1	Six-monthly or more frequently	>6 years	Climate-related risks are assessed at the aggregate portfolio level on at least an annual basis, and climate risks are assessed at the individual asset level on a continuous basis by leveraging our LightStay sustainability data reporting and management platform.

C2.2b

(C2.2b) Provide further details on your organization's process(es) for identifying and assessing climate-related risks.

Our definition of substantive financial impacts when identifying or assessing climate-related risks is as follows: (1) Economic high risk: based on current or future negative financial impacts and potential for negative impact on regional operations or guest experience. (2) Environmental high risk: based on potential for legal non-compliance or negative cost impacts through remediation or recovery efforts. (3) Social high risk: based on potential negative impact on brand, reputation and stakeholder relationships as well as potential for legal non-compliance.

Process for identifying and assessing climate-related risks at the company level: Since 2008, Hilton has conducted an annual assessment of potential climate change risks and opportunities deemed to have the potential for a substantive financial impact on the company. This risk assessment includes an assessment of the physical risk to our portfolio of properties, which is conducted by mapping our hotels against independently verified third-party data around climate change related factors such as risk of flooding, natural disasters, and drought. The assessment that is conducted at the company-level also includes planning for potential climate change regulations or mandatory energy efficiency standards that may impact the Company's financial performance, along with other issues that align with our broader corporate responsibility strategy. We are also integrating the results of our water risk assessments using the WWF Water Risk Filter to analyze climate-related risks on a regional basis and our results are closely aligned with water stress, in coastal areas and other high risk areas. Hilton works closely with its consultants, partners and stakeholders to stay apprised of emerging trends and potential risks on an ongoing basis and sets annual sustainability business plans and priorities accordingly. Additionally, the Global Utility Risk Committee meets annually to evaluate and plan the company's energy procurement strategy.

Process for identifying and assessing climate-related risks at the asset level: Risks and opportunities with respect to climate change are assessed at the hotel level on a continual basis. LightStay's sustainability surveys capture data on more than 200 sustainability-related property and operations activities, opportunities and best practices in the areas of energy efficiency, renewable energy, water efficiency, waste reduction, procurement, food and beverage, and more. As a Brand Standard, every Hilton property is required to complete the LightStay surveys within the first three months of opening, and then update annually. Specific details are also captured on hotel refrigerant and equipment usage, renewable energy and other potential carbon reduction measures. More rigorous assessments are conducted for owned and managed properties under our direct operational control for specific energy efficiency and carbon reduction projects, including on-site audits conducted regularly by regional directors and/or third party auditors. Additionally, utility cost risks and opportunities are evaluated by the Global Utility Risk Committee on an individual hotel basis, especially for the larger hotels and resorts owned by Hilton.

C2.2c

(C2.2c) Which of the following risk types are considered in your organization's climate-related risk assessments?

	Relevance & inclusion	Please explain
Current regulation	Relevant, always included	Current carbon taxes pose financial risk by increasing utility costs and decreasing net operating income to Hilton. In particular, the UK and various countries across the EU have already implemented carbon taxes or carbon-implicated taxes. Currently, we are experiencing impact from the CRC Energy Efficiency Scheme (CRC Scheme) which requires qualifying companies to report their energy use annually and purchase and surrender allowances to offset their emissions. In the UK, Hilton has seen average energy utility costs increase by 15% as a result of CRC and other environmental taxes. Similar situations can be seen elsewhere in the Western world.
Emerging regulation	Relevant, always included	New or revised laws and regulations or new interpretations of existing laws and regulations, such as those related to climate change, could affect the operation of our properties or result in significant additional expense and operating restrictions.
Technology	Relevant, always included	Hilton considers the impact of technology in our climate-related risk and opportunity assessments. We work to promote the adoption of products and innovative technologies that reduce energy, water and waste through various channels and vendor partnerships. New technologies are typically piloted at our owned and managed hotels, with wider adoption either mandated or encouraged across additional hotels in the portfolio as relevant.
Legal	Relevant, always included	Foreign or U.S. environmental laws and regulations may cause us to incur substantial costs or subject us to potential liabilities. We are subject to certain compliance costs and potential liabilities under various foreign and U.S. federal, state and local environmental, health and safety laws and regulations. These laws and regulations govern actions including air emissions, the use, storage and disposal of hazardous and toxic substances, and wastewater disposal. Our failure to comply with such laws, including any required permits or licenses, could result in substantial fines or possible revocation of our authority to conduct some of our operations.
Market	Relevant, always included	We face risks around the loss of conference business and revenues if we do not respond adequately to the shift in consumer behavior and sustainability needs of our corporate and group clients. In our industry, we face competition for individual guests, group reservations and conference business. We compete for these customers based primarily on brand name recognition and reputation, as well as location, room rates, property size and availability of rooms and conference space, quality of the accommodations, customer satisfaction, amenities and the ability to earn and redeem loyalty program points. Changing consumer behavior could directly affect travel behavior, especially corporate bookings for meetings and conferences. We continue to see increasing preference and demand by our corporate clients for products and services that minimize environmental impacts. We also see an increasing need by our corporate clients to track and minimize the environmental impact of their events in order to meet their overall corporate responsibility goals and reporting obligations.
Reputation	Relevant, always included	Because of the global nature of our brands and the broad expanse of our business and hotel locations, events occurring in one location could negatively affect the reputation and operations of otherwise successful individual locations. In addition, the expansion of social media has compounded the potential scope of negative publicity. We also could face legal claims related to negative events, along with resulting adverse publicity. A perceived decline in the quality of our brands or damage to our reputation could adversely affect our business, financial condition or results of operations.
Acute physical	Relevant, always included	Unpredictability in the frequency and severity of extreme weather events, such as hurricanes and droughts, is our most significant physical risk related to climate change. Many of our hotels are located in areas where they are vulnerable to the extreme variability in weather patterns that results from global climate change.
Chronic physical	Relevant, always included	Many of our hotels are located in coastal areas where they face chronic physical risks related to rising sea levels. In addition to creating a risk of increased damage to facilities and operating costs, increased flood risk in coastal areas as a result of climate change creates a risk of increased insurance premiums and reduced availability of insurance on our properties located in coastal regions.
Upstream	Relevant, always included	Upstream risks in our global supply chain represent a risk to our business, with the greatest risk being disruptions in global supply due to natural disasters, drought, flooding, or other climate-related impacts. We are one of the world's largest restauranteurs and we are at particularly high risk of business disruptions due to supply ofcontinuity in our food and produce supply chain.
Downstream	Relevant, always included	We include downstream Scope 3 emissions from hotel waste disposal in our risk and opportunity assessments. In particular, we assess and manage the carbon impact of food waste resulting from our hotels' operations.

C2.2d

(C2.2d) Describe your process(es) for managing climate-related risks and opportunities.

We continually prioritize and manage climate-related risks and opportunities based on our ability to influence and the relative importance to our business operations and stakeholder groups. Our risk and opportunity management is integrated into our operations, and on a company-wide basis, we prioritize activities that can be scaled up (to include franchised properties) and those that will create the greatest value for our hotels and customers.

Process for managing transitional risks and opportunities: To manage the transitional risks and opportunities related to complying with carbon-related legislation around the world, our regional Government Relations teams track existing and upcoming legislation and its applicability to our hotels. Our Property Operations and Corporate Responsibility teams then work together to reduce any risk of non-compliance with existing or forthcoming legislation. For example, to comply with the United Kingdom's CRC Energy Efficiency Scheme, we completed comprehensive upgrades to our LightStay system to improve reporting functionality. We also use ISO as a global standard to help us manage our transitional compliance risks, and our entire portfolio of owned, managed and franchised hotels is certified to three ISO Standards: ISO 9001 (Quality Management), ISO 14001 (Environmental Management) and ISO 50001 (Energy Management). Our careful and continuous management of our transitional risks has also resulted in significant opportunity for our company, as by continually engaging and educating our hotel staff on relevant regulatory requirements, our carbon reduction goals, and our Travel with Purpose strategy, we have been able to drive significant engagement with our Team Members around the world.

Process for managing physical risks and opportunities: We also actively manage our physical climate-change related risks and opportunities on a continual basis. Our Property Operations teams around the world are constantly evaluating the risk of natural disasters and working with our teams to prepare our hotels for any upcoming events. These teams are also continually seeking opportunities to improve our energy, carbon, water and waster efficiency at our hotels, by investing in efficiency upgrades. The Capital Expenditure process is formalized with various authority and specialization levels within the company, and Asset Management and Regional Engineering teams typically work together to evaluate and obtain budget approval for major building upgrade projects. These improvement projects, such as installation of on-site power generation, often have the dual benefit of helping our hotels mitigate risk associated with climate change, as well as helping us to reduce our energy costs.

C2.3

(C2.3) Have you identified any inherent climate-related risks with the potential to have a substantive financial or strategic impact on your business?

Yes

C2.3a

(C2.3a) Provide details of risks identified with the potential to have a substantive financial or strategic impact on your business.

Identifier
Risk 1

Where in the value chain does the risk driver occur?
Direct operations

Risk type
Physical risk

Primary climate-related risk driver
Chronic: Changes in precipitation patterns and extreme variability in weather patterns

Type of financial impact driver
Increased capital costs (e.g., damage to facilities)

Company- specific description
Unpredictability in the frequency and severity of extreme weather events, such as hurricanes and droughts, is our most significant physical risk related to climate change. Many of our hotels are located in areas where they are vulnerable to the extreme variability in weather patterns that results from global climate change. For example, several of our hotels in Texas and Puerto Rico were significantly damaged during in the 2017 hurricane season, resulting in increased capital costs.

Time horizon
Current

Likelihood
Very likely

Magnitude of impact
Medium-low

Potential financial impact
0

Explanation of financial impact
Potentially avoided risks are unknown given the uncertainty of physical risks from climate change that may result in catastrophic loss. We note that the bulk of the financial impact of an extreme weather event would be borne by insurance rather than by Hilton. However, any loss of this nature, whether insured or not, could potentially adversely affect our operational results and prospects for growth,

Management method
To mitigate the physical risk resulting from extreme weather events in the short term we invest significantly in disaster preparedness for our properties located in high risk areas, including investing in on-site power generation systems to ensure that our properties can maintain their power in the event of an emergency. In the long term, we believe that our science based targets will help us contribute to halting the harmful impacts of global climate change.

Cost of management
500000

Comment
Hilton has incorporated the management of the physical risks of climate change into our overall enterprise risk management framework. The estimated cost of management provided here includes the annual corporate contribution to the Hilton Responds Fund, which was developed to act as a vehicle to support short-term relief and long-term rebuilding efforts for Hilton Team Members and their families following a disaster.

Identifier
Risk 2

Where in the value chain does the risk driver occur?
Direct operations

Risk type
Physical risk

Primary climate-related risk driver
Chronic: Rising sea levels

Type of financial impact driver
Increased capital costs (e.g., damage to facilities)

Company- specific description
Climate change is a risk factor for our company because many of our hotels are located in coastal areas that are vulnerable to rising sea levels. In addition to creating a risk of increased damage to facilities and operating costs, increased flood risk in coastal areas as a result of climate change creates a risk of increased insurance premiums and reduced availability of insurance on our properties located in coastal regions. If our hotels flood more frequently as a result of rising sea level, we will experience a drop in sales and in corresponding revenue. We work with our environmental partner, WWF, to assess flood risk at each of our properties around the world, and we seek to mitigate this risk by assisting our properties with flood preparedness.

Time horizon
Medium-term

Likelihood
Very likely

Magnitude of impact

Medium-low

Potential financial impact
0

Explanation of financial impact
Potentially avoided risks are unknown given the uncertainty of physical risks from climate change that may result in catastrophic loss. We note that the bulk of the financial impact of an extreme flooding event would be borne by insurance rather than by Hilton. However, any loss of this nature, whether insured or not, could potentially adversely affect our operational results and prospects for growth,

Management method
To mitigate the physical risk resulting from rising sea levels we invest in flood preparedness at our hotels. In the long term, we believe that our science based targets will help us contribute to halting the harmful impacts of global climate change.

Cost of management
500000

Comment
Hilton has incorporated the management of the physical risks of climate change into our overall enterprise risk management framework. The estimated cost of management provided here includes the annual corporate contribution to the Hilton Responds Fund, which was developed to act as a vehicle to support short-term relief and long-term rebuilding efforts for Hilton Team Members and their families following a disaster.

Identifier
Risk 3

Where in the value chain does the risk driver occur?
Direct operations

Risk type
Transition risk

Primary climate-related risk driver
Policy and legal: Increased pricing of GHG emissions

Type of financial impact driver
Policy and legal: Increased operating costs (e.g., higher compliance costs, increased insurance premiums)

Company- specific description
Current and future carbon taxes pose financial risk by increasing utility costs and decreasing net operating income to Hilton as well as our management and franchise clients. In particular, the UK and various countries across the EU have already implemented carbon taxes or carbon-implicated taxes. Currently, we are experiencing impact from the CRC Energy Efficiency Scheme (CRC Scheme) which requires qualifying companies to report their energy use annually and purchase and surrender allowances to offset their emissions. In the UK, Hilton has seen average energy utility costs increase by 15% as a result of CRC and other environmental taxes. Similar situations can be seen elsewhere in the western world.

Time horizon
Short-term

Likelihood
Very likely

Magnitude of impact
Medium-low

Potential financial impact
15

Explanation of financial impact
Cost of carbon taxes are estimated to add 15% to total energy utility costs in the UK.

Management method
We use LightStay, our proprietary sustainability measurement system, as the primary management method to mitigate risk and drive energy efficiency and savings across our global portfolio of over 5,300 hotels. At a regional and local hotel level, we provides team members with information about the direct impact of carbon taxes on the hotel's utility costs and bottom line. Additionally, Hilton will also include potential CO2 and CRC savings in energy efficiency improvement projects. By increasing awareness of these impacts, we see greater opportunity to drive energy efficiency and renewable energy projects in order to offset these additional costs. (1) Global performance tracking for ALL hotels, with reporting at the individual hotel, global region, Brand and

Corporate level; (2) Environmental impact tracking of energy, water, waste, building and property operations, and improvement projects; (3) Calculates carbon footprint of any meeting or conference (4) Measures sustainability indicators across 200+ operational, design and construction practices; (5) Benchmarks peer performance between similar Hilton properties; (6) Utilizes data-driven modeling to predict and analyze utility consumption and costs; and (7) Environmental data verified annually by an independent third party.

Cost of management
100000

Comment
The cost of management of Hilton's emissions reporting obligations in the UK, including staff hours and consultant costs, is estimated to be $100,000.

Identifier
Risk 4

Where in the value chain does the risk driver occur?
Supply chain

Risk type
Transition risk

Primary climate-related risk driver
Technology: Substitution of existing products and services with lower emissions options

Type of financial impact driver
Technology: Costs to adopt/deploy new practices and processes

Company- specific description
In order to meet our long term Travel with Purpose targets to cut our environmental footprint in half and double our social impact investment by 2030 (including our science based greenhouse gas targets), we will need to continue to identify products that will help us reduce our carbon emissions and overall environmental footprint. Given the size and scale of our company, we note that available supply of reasonable substitutes can be a challenge. For example, in May 2018 we committed to remove plastic straws from all of our managed hotels, and we are already finding it a challenge to source enough paper straws from our suppliers to meet our demand. We expect that new technologies and suppliers will continue to join the marketplace as the transition to a low carbon economy continues, but we recognize that sourcing substitute lower emissions products can represent a challenge and a risk for an organization of our size.

Time horizon
Long-term

Likelihood
About as likely as not

Magnitude of impact
Low

Potential financial impact
0

Explanation of financial impact
At this time we do not have an estimate for the potential financial impact of this risk.

Management method
We continually challenge our suppliers to find more innovative solutions to our environmental challenges. As part of our new Travel with Purpose 2030 targets, we have committed to work closely with our suppliers to ensure that we are sustainably sourcing. We have also committed to encouraging our suppliers to set their own environmental and social goals, which we plan to validate through an auditing and incentive program. For example, we have committed to encouraging our suppliers to set their own greenhouse gas reduction targets. We believe that this supplier engagement will help us to mitigate the risks in our supply chain.

Cost of management
0

Comment
Hilton has incorporated the management of supply chain continuity risks into our overall enterprise risk management framework.

Identifier
Risk 5

Where in the value chain does the risk driver occur?
Direct operations

Risk type
Transition risk

Primary climate-related risk driver
Policy and legal: Mandates on and regulation of existing products and services

Type of financial impact driver
Policy and legal: Increased operating costs (e.g., higher compliance costs, increased insurance premiums)

Company- specific description
Hilton is subject to certain compliance costs and potential liabilities under various foreign and U.S. federal, state and local environmental, health and safety laws and regulations. These laws and regulations govern actions including air emissions, the use, storage and disposal of hazardous and toxic substances, and wastewater disposal. Our failure to comply with such laws, including any required permits or licenses, could result in substantial fines or possible revocation of our authority to conduct some of our operations. New or revised laws and regulations or new interpretations of existing laws and regulations, such as those related to climate change, could affect the operation of our properties or result in significant additional expense and operating restrictions on us. This applies specifically to Hilton's financial exposure for owned and managed properties, where Hilton is responsible for compliance as manager, but any required capital upgrades would be an owner expense. For franchised properties, Hilton is subject to reputation risk because of the global nature of our brands and the broad expanse of our business and hotel locations. Events occurring in one location could negatively affect the reputation and operations of otherwise successful individual locations.

Time horizon
Long-term

Likelihood
More likely than not

Magnitude of impact
Medium-low

Potential financial impact
15

Explanation of financial impact
The exact figure is unknown given the high level of uncertainty, but we estimate new regulations could increase total energy utility costs by 15%-20% based on our experience in the UK.

Management method
Hilton reduces non-compliance risk and ensures consistent quality in our through our Brand Standards and enterprise-wide ISO certifications: 1) Brand Standards: At Hilton, sustainability measurement and continuous improvement is a Brand Standard for all of our hotels (including owned, managed and franchised). We conduct periodic inspections to ensure that Brand Standards are maintained; typically, these quality assurance audits are conducted twice annually at all hotels. Using our LightStay platform, all hotels are required to report monthly utilities including energy, water and waste; set annual reduction targets; maintain active energy, water and waste improvement projects; and complete benchmarking surveys across all operating departments, consisting of over 200 sustainability best practices and performance indicators. Brand Standards require that all hotels comply with applicable environmental laws and regulatory requirements. (2) ISO Management Systems Standard: In 2017, we achieved ISO 50001 recertification for energy management for the entire Hilton portfolio, with initial certification achieved in 2014 as one of the largest-ever volume certifications of commercial buildings. We continue to partner with the US DOE to bring the Superior Energy Performance (SEP) certification program to the hotel industry. SEP provides us with performance metrics to drive continuous energy improvement aligned with our SBTs. Six Hilton-managed properties have now achieved SEP.

Cost of management
5

Comment
The cost of management of Hilton's global ISO 50001 certification program is estimated to be 5% of the company's corporate sustainability budget.

Identifier
Risk 6

Where in the value chain does the risk driver occur?
Direct operations

Risk type

Transition risk

Primary climate-related risk driver
Reputation: Increased stakeholder concern or negative stakeholder feedback

Type of financial impact driver
Reputation: Reduced revenue from decreased demand for goods/services

Company- specific description
Climate change will likely increase humanitarian demands in third-world countries as well as localities impacted by severe weather events and natural disasters. Food and water shortages, competition for resources and political instability will likely impact the supply chain as well as the ability of local communities to meet basic human needs. Changes in ownership or management practices, the occurrence of accidents or injuries, natural disasters, crime, individual guest notoriety or similar events at our hotels and resorts can harm our reputation, create adverse publicity and cause a loss of consumer confidence in our business. Because of the global nature of our brands and the broad expanse of our business and hotel locations, events occurring in one location could negatively affect the reputation and operations of otherwise successful individual locations. We have a rich history of community investment, and our founder's legacy of generosity permeates throughout our organization; it is our responsibility to support our Team Members and the communities where we live, work and travel in times of crisis. Hilton sees increased future opportunity to make a difference globally with our Travel with Purpose commitment to responsible tourism and our 2030 Value Chain Targets.

Time horizon
Medium-term

Likelihood
About as likely as not

Magnitude of impact
Medium-low

Potential financial impact
0

Explanation of financial impact
At this time we do not have an estimate for the potential financial impact of this risk.

Management method
Managed through Travel with Purpose and our global commitment to community service. Current initiatives include: (1) Our Global Month of Service is an annual celebration in which our hotels around the world host or participate in hands-on volunteer projects. In 2017, hotels from 87 countries participated in more than 4,166 community projects resulting in over 267,355 volunteer hours. For example, 50 Team Members helped build and improve homes in the outskirts of Lima, Peru that were affected by floods in March 2017, and launched soap recycling in the city. (2) In 2017, Hilton invested $397,000 in Travel with Purpose Action Grants to support 129 Team Member-led local innovative social and environmental projects. To date, we have invested over $1 million in Action Grants, providing growth and outreach locally and globally. (3) We developed the Hilton Responds Fund to enable Hilton Team Members and franchise employees to donate funds that support communities following a disaster and provide for long-term rebuilding efforts. The Fund provides assistance to those who are impacted by disaster and acts as a vehicle for Hilton to match the generosity of our employees' voluntary contributions. Since launching the Fund in 2013, we have matched donations for 20 disasters, raising more than $3 million dollars. (4) In 2017, we worked with Clean The World to recycle and distribute 6 million bars of soap, contributing to a 35% reduction in hygiene-related diseases worldwide.

Cost of management
500000

Comment
Hilton has incorporated the management of this risk into our overall enterprise risk management framework. The estimated cost of management provided here includes the annual corporate contribution to the Hilton Responds Fund, which was developed to act as a vehicle to support short-term relief and long-term rebuilding efforts for Hilton Team Members and their families following a disaster.

C2.4

(C2.4) Have you identified any climate-related opportunities with the potential to have a substantive financial or strategic impact on your business?
Yes

C2.4a

(C2.4a) Provide details of opportunities identified with the potential to have a substantive financial or strategic impact on your business.

Identifier
Opp1

Where in the value chain does the opportunity occur?
Direct operations

Opportunity type
Resource efficiency

Primary climate-related opportunity driver
Move to more efficient buildings

Type of financial impact driver
Reduced operating costs (e.g., through efficiency gains and cost reductions)

Company- specific description
One of the largest opportunities that we have realized through our sustainability efforts has been significant reductions in operating costs as our hotels continually seek to improve their efficiency in energy, carbon, waste and water. Since 2008, Hilton has reduced carbon emissions intensity by 33.6%, waste intensity by 35.8%, energy use intensity by 22.3% and water use intensity by 18.5% across our global owned and managed portfolio. We estimate that these reductions have saved a cumulative $1 billion in utility costs. These savings are significant to our bottom line and demonstrate that a continual focus on sustainability and resource efficiency can result in huge value to a business.

Time horizon
Current

Likelihood
Virtually certain

Magnitude of impact
Medium-high

Potential financial impact
1000000000

Explanation of financial impact
To date we have achieved $1 billion in cumulative savings across our global portfolio from operating sustainably (2008 baseline).

Strategy to realize opportunity
We have achieved significant reductions through our focus on operating our hotels as efficiently as possible. However, we know that we still have work to do. We plan to continue to manage this opportunity through our new science-based targets, which will enable us to track our carbon emissions and ensure that we are remaining aligned with our carbon budget as defined by the Sectoral Decarbonization Approach. Significantly, we will also increase our engagement with our suppliers, as defined in our new Travel with Purpose targets around supplier engagement. We will encourage our suppliers to set their own environmental goals, including carbon emissions goals, in order to continue to decrease our Scope 3 emissions.

Cost to realize opportunity
0

Comment
The cost to manage this opportunity is negligible and is built into the job responsibilities of the Hilton Operations and Engineering teams across the global regions.

Identifier

Where in the value chain does the opportunity occur?
Direct operations

Opportunity type
Products and services

Primary climate-related opportunity driver
Shift in consumer preferences

Type of financial impact driver
Better competitive position to reflect shifting consumer preferences, resulting in increased revenues

Company- specific description
We face competition for individual guests, group reservations and conference business. We compete for these customers based primarily on brand name recognition and reputation, as well as location, room rates, property size and availability of rooms and conference space, quality of the accommodations, customer satisfaction, amenities and the ability to earn and redeem loyalty program points. According to a survey of 72,000 Hilton guests, social, environmental and ethical considerations are central to their buying preferences, especially those younger than 25 years old. The survey found that 33% of guests actively seek environmental and social information before booking. We also see an increasing need by our corporate clients to track and minimize the environmental impact of their events in connection with their overall corporate responsibility goals and reporting obligations. To ensure our competitive position and to realize the opportunity to meet the needs of this important customer segment, we created "Meet with Purpose" in 2015. Through our Meet with Purpose sustainable meeting offering, we partner with our guests and corporate clients to reduce greenhouse gas emissions from guest nights, meetings and events. Using our LightStay system, Meet with Purpose provides meeting planners with a quantified report of the projected carbon emissions from their meeting, as well as with options to reduce emissions, waste and other environmental impacts customized to the group's specific conference needs. In our Asia Pacific region, we also offer carbon offsets to reduce the impact of meetings and events through our Clean Air Program (http://www.hiltonworldwidemeetingsapac.com/cleanair). Through these programs we are able to differentiate ourselves from our competitors and adapt to shifting consumer preferences. We expect consumers to continue to demand more transparent sustainability initiatives from their hotel companies, and we will continue to adapt to these changing preferences.

Time horizon
Short-term

Likelihood
Very likely

Magnitude of impact
Medium

Potential financial impact
10

Explanation of financial impact
We estimate that at this time, our Meet with Purpose program may account for approximately 10% of meeting and event sales.

Strategy to realize opportunity
Hilton's Meet with Purpose program is designed to make it easier for meeting professionals to reduce waste and incorporate health and wellness into their meetings and events. Meet with Purpose provides meeting professionals with sustainable choices to incorporate into events that not only enhance the experiences of attendees, but also align with many customers' corporate responsibility goals. Inspired by Hilton's corporate responsibility strategy, Travel with Purpose, Hilton gathered feedback from customers and sales Team Members to identify the most pressing sustainability issues for meetings and events. Through LightStay, we help our group clients meet their corporate responsibility goals and minimize the environmental impact of their events. LightStay's Meeting Impact Calculator enables all Hilton Worldwide Sales and Marketing teams to calculate the carbon footprint of any event at one of our hotels. The tool also provides our customers and hotels with specific recommendations and actions to minimize our customers' footprint during their stay. In Asia Pacific, we use the Meeting Calculator to calculate the carbon emissions generated by meetings and events to purchase carbon credits to offset the impact. Hilton's Clean Air Program is an effort to offset carbon from meetings and events in more than 50 participating Asia Pacific hotels.

Cost to realize opportunity
0

Comment
The cost of low carbon products and services, such as our Meet with Purpose and our carbon offset programs, are not borne by Hilton, so the cost to realize this opportunity is $0.

Identifier
Opp3

Where in the value chain does the opportunity occur?
Direct operations

Opportunity type
Resource efficiency

Primary climate-related opportunity driver
Use of recycling

Type of financial impact driver
Reduced operating costs (e.g., through efficiency gains and cost reductions)

Company- specific description
Changes in physical climate parameters (such as sea level rise or changes in natural resources) may create stresses on human carrying capacity in certain areas by removing valuable land from its most productive use. Landfills not only take up valuable land, they also discharge significant CO2 emissions (methane) and cause soil and water pollution. The World Bank estimates that global urban populations create 1.6 billion tons of solid waste per year, and more than half of that ends up in landfills. In the United States, the hospitality industry alone produces 1.9 billion pounds of waste annually. We see this area as an opportunity to leverage relevant partner organizations and unlock our Team Members' creative minds to rethink our approach to materials and provide innovative solutions to recycle and redefine waste. Moreover, we know that food waste comprises approximately 40% of the landfill waste at a hotel, and globally 30% of food gets wasted - enough to feed more than three times the total number of malnourished in the world. We see reducing food waste as a huge opportunity for us to make a positive environmental and social impact while also benefiting our bottom line.

Time horizon
Short-term

Likelihood
Likely

Magnitude of impact
Medium-low

Potential financial impact
14000000

Explanation of financial impact
Based on our analysis, we estimate that reducing food waste at our owned and managed properties by just 2% would save us $14,000,000 in annual food costs.

Strategy to realize opportunity
We leverage LightStay, our proprietary corporate responsibility performance measurement platform, to understand how our hotels are managing waste and driving improvements over time. Since launching LightStay, we've gathered over ten years of data across our hotel portfolio and have used this information to drive greater efficiencies and to create best practices and training for our hotels worldwide. As a Brand Standard, managed and franchised hotels are required to set annual diversion goals and complete improvements to their waste management practices. In addition, we create resources and innovative partnerships that help our hotels improve their waste reduction and diversion from landfill. For food waste in particular, we have partnered with WWF to launch food waste reduction pilots to understand how we can reduce food waste in our hotels. We have also partnered with innovative food technology companies, such as food reduction scale and software providers, food digester companies, and food supply chain optimization organizations to reduce food waste across our business. We have set the goal to reduce our food waste to landfill by 50%, and we will use this goal to continue to drive better drive the adoption of food waste diversion and donation programs across our portfolio.

Cost to realize opportunity
0

Comment
We have found that our food waste initiatives either create cost savings or to be cost neutral, further demonstrating the value of such a program to our business.

C2.5

(C2.5) Describe where and how the identified risks and opportunities have impacted your business.

	Impact	Description
Products and services	Impacted for some suppliers, facilities, or product lines	Opportunity: Hilton's Meet with Purpose offering and our APAC carbon offset program have positively impacted group sales for participating hotels. Magnitude of impact: While we do not currently have detailed data on uptake of the Meet with Purpose offering, we estimate that this may comprise approximately 10% of meeting and event sales.
Supply chain and/or value chain	Impacted for some suppliers, facilities, or product lines	Risk: Several of our managed hotels in Texas and Puerto Rico were significantly damaged during in the 2017 hurricane season, resulting in increased capital costs which were borne by insurance and our owners. To mitigate this risk in the short term, we invest significantly in disaster preparedness for our properties located in high risk areas, including owner-approved investments in on-site power generation systems to ensure that our properties can maintain their power in the event of an emergency. Magnitude of impact: We contribute approximately $500,000 per year to the Hilton Responds Fund, which was developed to act as a vehicle to support short-term relief and long-term rebuilding efforts for Hilton Team Members and their families following a disaster.
Adaptation and mitigation activities	Impacted	Opportunity: We continually invest in our LightStay system to implement additional tools and resources for hotels and multi-property users to help educate and drive sustainability performance and legislative compliance across managed and franchised hotels. One way in which we use the system to drive research and implementation of innovative new projects is through our Projects Library. Every hotel is required to have an ongoing energy, water and waste improvement project entered into LightStay at all times, and the hotels use LightStay to identify and implement new projects. Magnitude of impact: Currently there are over 13,000 active improvement projects logged into LightStay, and the information on these projects is made available to hotels through the Project Library.
Investment in R&D	Impacted	Opportunity: We continually invest in our LightStay system to implement additional tools and resources for hotels and multi-property users to help educate and drive sustainability performance and legislative compliance across managed and franchised hotels. One way in which we use the system to drive research and implementation of innovative new projects is through our Projects Library. Every hotel is required to have an ongoing energy, water and waste improvement project entered into LightStay at all times, and the hotels use LightStay to identify and implement new projects. Magnitude of impact: Currently there are over 13,000 active improvement projects logged into LightStay, and the information on these projects is made available to hotels through the Project Library.
Operations	Impacted	Opportunity: We have achieved significant savings through our efforts to address climate change risks through improved hotel energy efficiency and resource utilization, as well as our integration of sustainability best practices across all operating departments. Magnitude of impact: Our portfolio of hotels have achieved an estimated cumulative savings of $1 billion since 2008.
Other, please specify	Please select	

C2.6

(C2.6) Describe where and how the identified risks and opportunities have factored into your financial planning process.

	Relevance	Description
Revenues	Impacted for some suppliers, facilities, or product lines	Opportunity: We face competition for revenue from individual guests, group reservations and conference business. We compete for these customers based primarily on brand name recognition and reputation, as well as location, room rates, property size and availability of rooms and conference space, quality of the accommodations, customer satisfaction, amenities and the ability to earn and redeem loyalty program points. According to a survey of 72,000 Hilton guests, social, environmental and ethical considerations are central to their buying preferences, especially those younger than 25 years old. The survey found that 33% of guests actively seek environmental and social information before booking. We also see an increasing need by our corporate clients to track and minimize the environmental impact of their events in connection with their overall corporate responsibility goals and reporting obligations. We are beginning to incorporate this opportunity into our revenue planning processes by offering green meeting options, such as our Meet with Purpose program and our APAC carbon offset offering. Through these programs we are able to differentiate ourselves from our competitors and adapt to shifting consumer preferences. Magnitude of impact: We estimate that at this time, our Meet with Purpose program may account for approximately 10% of meeting and event sales.
Operating costs	Impacted	Opportunity: As noted above, we have achieved significant reductions in operating costs through our efforts to address climate change risks through improved hotel energy efficiency and resource utilization, as well as our integration of sustainability best practices across all operating departments. Magnitude of impact: Our portfolio of hotels have achieved an estimated cumulative savings of $1 billion since 2008.
Capital expenditures / capital allocation	Impacted for some suppliers, facilities, or product lines	Risk: As noted above, several of our managed hotels in Texas and Puerto Rico were significantly damaged during in the 2017 hurricane season, resulting in increased capital costs which were borne by insurance and our owners. To mitigate this risk in the short term, we invest significantly in disaster preparedness for our properties located in high risk areas, including owner-approved investments in on-site power generation systems to ensure that our properties can maintain their power in the event of an emergency. Magnitude of impact: We contribute approximately $500,000 per year to the Hilton Responds Fund, which was developed to act as a vehicle to support short-term relief and long-term rebuilding efforts for Hilton Team Members and their families following a disaster.
Acquisitions and divestments	Impacted for some suppliers, facilities, or product lines	Risk: Physical risk from climate-related impacts has factored into Hilton's financial planning and divestiture of a majority of its owned real estate assets.The potential for changes in the frequency, duration and severity of extreme weather events that may be a result of climate change could lead to significant property damage at our hotels and other assets, affect our ability to obtain insurance coverage in areas that are most vulnerable to such events, such as the coastal resort areas where we operate, and have a negative effect on revenues. Additionally, certain of our properties may qualify as legally-permissible nonconforming uses and improvements, including certain of our iconic and most profitable properties. If a substantial portion of any such properties were to be destroyed by fire or other casualty, we might not be permitted to rebuild that property as it now exists, regardless of the availability of insurance proceeds. Any loss of this nature, whether insured or not, could materially adversely affect our operational results and prospects for growth. To mitigate this and other risks, effective as of January 3, 1017, we completed the spin-offs of our timeshare business and the majority of our real estate assets into Hilton Grand Vacations and Park Hotels & Resorts, respectively, The Park properties will continue to be a part of the Hilton system as managed and franchised properties, reporting their utility data and other activities through LightStay. Magnitude: The spin-off included a total of 67 hotels with 35,406 rooms that were previously owned or leased by Hilton or unconsolidated affiliates of Hilton. Many of these are iconic hotels in major gateway cities with significant underlying real estate value, including the Hilton New York, Hilton Hawaiian Village and the London Hilton on Park Lane. Through these actions, we significantly simplified our company and the new Hilton is a fee-driven, capital-efficient company with a more resilient earnings profile.
Access to capital	Not impacted	At this time, we have not seen any impacts to our access to capital resulting from climate change risks or opportunities.
Assets	Impacted for some suppliers, facilities, or product lines	Risk: As noted above, several of our managed hotels in Texas and Puerto Rico were significantly damaged during the 2017 hurricane season, resulting in increased capital costs which were borne by insurance and our owners. While we do not own these assets, we still take action to mitigate the risks associated with operating these assets. To do so, we invest significantly in disaster preparedness for our properties located in high risk areas, including owner-approved investments in on-site power generation systems to ensure that our properties can maintain their power in the event of an emergency. Magnitude of impact: We contribute approximately $500,000 per year to the Hilton Responds Fund, which was developed to act as a vehicle to support short-term relief and long-term rebuilding efforts for Hilton Team Members and their families following a disaster.
Liabilities	Impacted for some suppliers, facilities, or product lines	At this time we do not consider any existing Hilton liabilities to be negatively impacted by climate change-related risks and opportunities. Potential liabilities from climate-related impacts has factored into Hilton's financial planning process as explained in acquisitions and divestments above. Through completion of the spin-off of 67 hotels that were previously owned or leased by Hilton, we have reduced our direct financial liabilities with respect to major property damage or destruction from climate-related events not covered by insurance.
Other	Please select	

C3. Business Strategy

C3.1

(C3.1) Are climate-related issues integrated into your business strategy?
Yes

C3.1a

(C3.1a) Does your organization use climate-related scenario analysis to inform your business strategy?
Yes, qualitative and quantitative

C3.1c

(C3.1c) Explain how climate-related issues are integrated into your business objectives and strategy.

Hilton has integrated climate-related issues such as energy and water management into our business objectives for years through our continual focus on improving the environmental performance of our hotels and driving responsible travel and tourism across our industry.

This year, after significant input from leadership across our entire business, we released our new Travel with Purpose long-term commitment to cut our environmental footprint in half and double our social impact investment by 2030. As part of our new corporate responsibility strategy, we have committed to 23 value chain sub-targets, including our science-based targets to reduce our carbon emissions intensity by 61% (Scope 1 and 2 Owned and Managed hotels) and 52% (Scope 3 Franchised hotels) by 2030. Driven by our need to mitigate climate-related risks to our business as well as our desire to publicly demonstrate our commitment to fighting climate change, our SBTs, which have been approved by the SBTi, are the most substantial example of a business decision that we have made to date that thoroughly integrates climate-related decision-making and the 2 degree scenario into our company's strategy. The integration of our SBTs into our business model will drive significant amounts of new investment in energy efficiency and renewable energy across our global hotel portfolio.

Along with our science-based carbon targets, our new Travel with Purpose goals also include our commitment to reduce our water use intensity and waste intensity by 50% by 2030, and to engage with our supply chain to reduce our suppliers' environmental impact. Our goal to reduce the amount of food waste being sent to landfill from our owned and managed hotels by 50% by 2030 is another example of a significant climate-related business decision from this past year, and one that is a new focus for the business. By reducing food waste in our supply chain as well as in our hotels, we will be able to significantly contribute to a reduction in our Scope 3 GHG emissions, and we will also be able to increase our positive impact in the communities in which we operate.

We believe that our 2030 Travel with Purpose value chain targets, including our science-based targets, fully support our corporate mission and objectives and ultimately will contribute significantly to Hilton's brand value, growth and financial success.

C3.1d

(C3.1d) Provide details of your organization's use of climate-related scenario analysis.

Climate-related scenarios	Details
2DS	Scenario used: Our science-based targets were developed using the sectoral decarbonization approach, which is based on the 2 degree scenario (2DS). Inputs, assumptions, and analytical methods used: We used the Service Buildings decarbonization pathway from the SDA, combined with the allocated Electric Power Grid decarbonization pathway from the SDA since most of our GHG emissions result from purchased electricity. Using a similar methodology used by the International Tourism Partnership to estimate the variance in hotel industry growth projections compared to overall commercial buildings, we adjusted the level of intensity and absolute reductions needed to stay within the allocated carbon budget from Service Buildings but representative of our portfolio's growth. The calculations are based on estimated annual growth in room count, normalized by the average gross floor area of guestrooms in various segments of our portfolio to arrive at the growth projections of floor area to match the SDA intensity metric of Service Buildings. We set our base year of 2008, back-forecasted from the 2010 base of the SDA's carbon budget. We set our primary target for 2030 within a 15-year horizon to align with the SBTi. We separated out the carbon budget, pathway, and reduction target into two sets, one for our Scope 1 & 2 emissions for which we have operational control, and our Scope 3 emissions from franchised properties. As a result, 100% of our current and projected portfolio is covered within the boundary for our target and carbon budget. Time horizon and organizational areas considered: Through our SBT setting process, we undertook quantitative and qualitative analysis of how the 2DS will impact all areas of our business over the next three decades, through 2050. We then aligned the target with the long-term decarbonization pathway of Service Buildings, setting interim milestones of 2030 and 2040. This time-frame was selected to align with the modelling of the 2DS and to align with our company's long-term business strategy. Results of analysis: Our carbon budget and decarbonization pathway in 2030 equals a 61% reduction in GHG emissions per square meter from 2008 for our owned and managed properties, and a 52% reduction in GHG emissions per square meter from 2008 for our franchised properties. These figures are based on a projected decarbonization pathway of annual performance, similar to a peak-and-decline scenario. The intensity targets for 2030 reflect the reductions achieved when aligned with the pathway annually, and will be adjusted accordingly should our performance vary from the annual projections in order to stay within the allocated carbon budget for the portfolio within Service Buildings as an SDA sector. How analysis has informed business strategy: The results of the 2DS analysis directly informed our SBTs and our Travel with Purpose 2030 goals, which in turn have significantly influenced our objectives and strategy across nearly every aspect of our business. For example, our 2DS modelling has enabled us to truly integrate climate change into our business objectives, and to drive further engagement and focus across our business with respect to renewables procurement and climate change resilience.

Lighting: Data is included for 511 lighting upgrade projects, which were reported in LightStay as implemented (in-process or complete) in 2017 for the owned and managed hotels. The vast majority of projects are new LED installations and retrofit lighting throughout the hotel including lobbies and public areas, guest rooms, ballrooms and meeting space, restaurants, back of house, exterior and parking lighting. Overall, the lighting projects analyzed reflect a 58% ROI and an average payback of 1.7 years. The median project cost was $6,500, with a minimum cost of $1,000 and a maximum cost of $500,000.

HVAC systems and controls: Data is included for 311 projects with a total energy efficiency projects, which were reported in LightStay as implemented (in-process or complete) in 2017 for the owned and managed hotels. Projects includes energy efficient upgrades and replacements to chiller plants, HVAC equipment and ventilation systems, boiler and domestic hot water systems, energy management systems and controls upgrades for building and guest rooms, installation of VFDs/VSDs on fans and pumps and other upgrades beyond normal maintenance activities. Projects analyzed reflect an average ROI of 24% and an average payback of 4.2 years. The median project cost was $27,000, with a minimum cost of $1,500 and a maximum cost of $1.2 million.

Renewable Energy and Distributed Generation: Data is included for 13 projects that were reported in LightStay as implemented (in-process or complete) in 2017 for the owned and managed hotels. Projects include new installation of electricity cogeneration plant, district heating, solar photovoltaic and hot water heating systems. Overall, projects analyzed reflect a 17% ROI with average payback of 5.8 years. The median project cost was $67,500, with a minimum cost of $6,500 and a maximum cost of $900,000.

C4.3c

(C4.3c) What methods do you use to drive investment in emissions reduction activities?

Method	Comment
Compliance with regulatory requirements/standards	Hilton uses energy and emissions reporting requirements to drive emissions reduction improvements based on requirements in the individual global regions. For example, the CRC Energy Efficiency Scheme in the UK requires hotels to report their energy use annually and purchase and surrender allowances to offset their emissions. Considering a shorter payback period with combined energy and carbon tax cost savings, the Hilton manager is more likely to obtain owner's approval for recommended energy efficiency upgrades.
Employee engagement	Through LightStay, we educate and actively engage employees in implementing best practices that reduce energy, water and waste impacts across all hotel operations. All departments (property operations/engineering, housekeeping, sales, food and beverage, management and front desk operations) participate annually in LightStay's Operations Survey, which consists of over 200 best practices and improvement opportunities in the areas of energy efficiency, renewable energy, water efficiency, waste reduction, procurement, food and beverage, and more. Additionally, we have recruited over 1,000 employees to serve as sustainability champions and/or serve on sustainability committees.
Financial optimization calculations	Financial calculators are built into LightStay to help drive investment in energy efficiency and other emissions reduction activities. LightStay upgrades launched in 2017 utilize data-driven modeling to predict and analyze utility consumption and costs. LightStay's Projects module calculates energy, emissions and utility cost savings based on estimated project costs and anticipated payback, which helps inform and drive project implementation.
Internal incentives/recognition programs	Bonus potential for Directors of Property Operations for Hilton managed properties is tied to the attainment of sustainability goals, including reduction in energy consumption and carbon emissions (for certain regions) for their hotel's respective operation. Performance indicators are defined based on previous year consumption for each region. Measures used are hotels' energy intensity (kBTU per square foot) and CO2e in pounds per square foot. In addition, regional programs are in place that reward engineering teams with the best overall sustainability results, including energy year-over-year consumption reductions, waste efforts, sustainability related training, etc.
Dedicated budget for other emissions reduction activities	Hilton has a dedicated corporate responsibility budget, which is used for ongoing management and expansion of LightStay, research and development, stakeholder engagement and other activities that we utilize to help drive emissions reductions across Hilton's global portfolio. Individual regions have dedicated budgets for emissions reduction activities to support their managed hotels in compliance, financial evaluation of capital improvements, stakeholder engagement, innovation projects and other initiatives.

C4.5

(C4.5) Do you classify any of your existing goods and/or services as low-carbon products or do they enable a third party to avoid GHG emissions?

Yes

C4.5a

(C4.5a) Provide details of your products and/or services that you classify as low-carbon products or that enable a third party to avoid GHG emissions.

Level of aggregation
Company-wide

Description of product/Group of products
The reductions in GHG emissions that we achieve through our own emissions reductions, including those that will be achieved through our SBTs, help our owners using the financial control boundary to reduce their own Scope 1 and 2 emissions. Additionally, the emissions reductions that we achieve enable our corporate customers to reduce their Scope 3 emissions.

Are these low-carbon product(s) or do they enable avoided emissions?
Avoided emissions

Taxonomy, project or methodology used to classify product(s) as low-carbon or to calculate avoided emissions
Other, please specify (GHG Protocol)

% revenue from low carbon product(s) in the reporting year
100

Comment
Our efforts to reduce our carbon emissions result in avoided emissions for our owners and our corporate clients across all of our hotels, representing 100% in revenue from owned and managed properties.

Level of aggregation
Product

Description of product/Group of products
Through our Meet with Purpose sustainable meeting offering, we partner with our guests and corporate clients to reduce greenhouse gas emissions from guest nights, meetings and events. Using our LightStay system, Meet with Purpose provides meeting planners with a quantified report of the projected carbon emissions from their meeting, as well as with options to reduce emissions, waste and other environmental impacts customized to the group's specific conference needs. In our Asia Pacific region, we also offer carbon offsets to reduce the impact of meetings and events through our Clean Air Program (http://www.hiltonworldwidemeetingsapac.com/cleanair).

Are these low-carbon product(s) or do they enable avoided emissions?
Avoided emissions

Taxonomy, project or methodology used to classify product(s) as low-carbon or to calculate avoided emissions
Other, please specify (GHG Protocol)

% revenue from low carbon product(s) in the reporting year
10

Comment
At this time we estimate that less than 10% of meetings and events are Meet with Purpose events or are offset through our APAC Clean Air Program. However, we are seeking to increase our data collection on these events moving forward.

C5. Emissions methodology

C5.1

(C5.1) Provide your base year and base year emissions (Scopes 1 and 2).

Scope 1

We are reporting a Scope 2, location-based figure

Scope 2, market-based
We are reporting a Scope 2, market-based figure

Comment
We report both location-based and market-based Scope 2 emissions.

C6.3

(C6.3) What were your organization's gross global Scope 2 emissions in metric tons CO2e?

Row 1

Scope 2, location-based
1811065

Scope 2, market-based (if applicable)
1728102

End-year of reporting period
<Not Applicable>

Comment

C6.4

(C6.4) Are there any sources (e.g. facilities, specific GHGs, activities, geographies, etc.) of Scope 1 and Scope 2 emissions that are within your selected reporting boundary which are not included in your disclosure?
No

C6.5

(C6.5) Account for your organization's Scope 3 emissions, disclosing and explaining any exclusions.

Purchased goods and services

Evaluation status
Relevant, calculated

Metric tonnes CO2e
900000

Emissions calculation methodology
As part of our science-based target setting process, we used the WRI Scope 3 Evaluator tool to estimate our emissions from our most material categories of purchased goods and services.

Percentage of emissions calculated using data obtained from suppliers or value chain partners
25

Explanation
We note that we face significant complexity in calculating the environmental impact of our supply chain, which extend beyond 100 countries and span multiple industries, legal contexts and infrastructure challenges. We are addressing emissions reduction in our supply chain through our Responsible Sourcing Policy and initiatives that encourage the use of products and services that minimize greenhouse gas emissions and other environmental impacts.

Capital goods

Evaluation status
Relevant, calculated

Metric tonnes CO2e
30000

Emissions calculation methodology
As part of our science-based target setting process, we used the WRI Scope 3 Evaluator tool to estimate our emissions from capital goods.

Percentage of emissions calculated using data obtained from suppliers or value chain partners
50

Explanation
As noted above, we face significant complexity in calculating the environmental impact of our supply chain. We are addressing emissions reduction in our supply chain through our Responsible Sourcing Policy and initiatives that encourage the use of products and services that minimize greenhouse gas emissions and other environmental impacts.

Fuel-and-energy-related activities (not included in Scope 1 or 2)

Evaluation status
Relevant, calculated

Metric tonnes CO2e
94175

Emissions calculation methodology
The Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standard (Revised Edition).

Percentage of emissions calculated using data obtained from suppliers or value chain partners
93

Explanation
As outlined in the "Reference Materials and Data Sources" of CDP's Accounting of Scope 2 Emissions and as described in the GHG Protocol Corporate Standard, end users should report electricity transmission and distribution losses under Scope 3 and should report electricity physically delivered to their facilities under Scope 2. Following the updated Standard, electricity emission factors and grid loss data obtained from global emissions data sources (i.e., eGRID, IEA, DEFRA and individual countries) were used to calculate transmission and distribution losses. Consistent with our approach for the Scope 2 emissions, Scope 3 emissions from grid loss were grossed up to 100% of the owned and managed portfolio. Our results reflect an average grid loss of 5.2% for the owned and managed properties (operational control).

Upstream transportation and distribution

Evaluation status
Not relevant, explanation provided

Metric tonnes CO2e
0

Emissions calculation methodology
N/A

Percentage of emissions calculated using data obtained from suppliers or value chain partners
0

Explanation
Emissions from upstream transportation and distribution of purchased goods and services are included in our supply chain assessment per "Purchased Goods and Services" above.

Waste generated in operations

Evaluation status
Relevant, calculated

Metric tonnes CO2e
173998

Emissions calculation methodology
We have calculated our emissions from waste generated in operations using the U.S. Environmental Protection Agency Climate Change Emissions Index. Per the EPA, each pound of trash thrown away will emit approximately 0.94 pounds of CO2e in the form of methane.

Percentage of emissions calculated using data obtained from suppliers or value chain partners
63

Explanation
Waste totals include primary data (landfill and recycled/composted waste) 100% of Hilton owned and managed hotels under Hilton's operational control as of December 31, 2017. Primary data is included for 63% of hotels with 2016-2017 monthly waste data entered in LightStay deemed complete, excluding outliers. Annual waste totals have been extrapolated to include 100% of the Hilton owned and managed portfolio enrolled in LightStay during the 2017 reporting year, using the brand average to estimate annual emissions for hotels with incomplete data and prorated emissions for new hotels.

Business travel

Evaluation status
Relevant, calculated

Metric tonnes CO2e
28145

Emissions calculation methodology
1) Methodology for Air Travel emissions: Emission estimates are provided according the Greenhouse Gas Protocol methodology; flight distance is tracked by Hilton Supply Management Global Travel Services and used to complete air emission estimates: air mileage is multiplied by three emission factors for short/medium /long haul flights according to definitions and factors provided by GHG Protocol. 2) Methodology for Rental Car emissions: Emissions from rental cars are calculated based on the distance traveled and the average combined MPG for each car class. Fuel consumed is calculated by dividing the total miles driven (mileage reported by Enterprise) for each vehicle in the car class by the average combined miles per gallon for that car class. Emissions are then calculated by multiplying the gallons of fuel consumed by the EPA CO2 emissions factor of 19.357 lbs. of CO2 per gallon.

Percentage of emissions calculated using data obtained from suppliers or value chain partners
90

Explanation
Emissions from employee business travel (air and rental car) is tracked by Hilton Supply Management Global Travel and Expense Services. Corporate Policy requires that all business travel must be booked through Hilton Supply Management Global Travel Services and its approved travel partners. This ensures minimal leakage and accurate reporting of emissions data for air and rental car use across Hilton's corporate staff and global operations. Reported emissions includes all Hilton global air travel booked through Hilton Global Travel Services and total emissions from rental vehicles are included for the US only.

Employee commuting

Evaluation status
Relevant, calculated

Metric tonnes CO2e
800000

Emissions calculation methodology
As part of our science-based target setting process, we used the WRI Scope 3 Evaluator tool to estimate our emissions from employee commuting.

Percentage of emissions calculated using data obtained from suppliers or value chain partners
100

Explanation
Emissions from employee commuting were estimated based on the number of Hilton employees working at our corporate offices and our owned and managed properties worldwide. We note that we also collect and analyze information on average alternative transportation use and employee transit incentives in place at all managed and franchised hotels worldwide through LightStay, which provides valuable insights and helps us encourage emissions reductions from employee commuting.

Upstream leased assets

Evaluation status
Not relevant, explanation provided

Metric tonnes CO2e
0

Emissions calculation methodology
N/A

Percentage of emissions calculated using data obtained from suppliers or value chain partners
0

Explanation
Emissions for Hilton's leased hotel assets are already included in our reported Scope 1 and Scope 2 emissions inventory. Leased office space is estimated at approximately 90,000 m2 worldwide, including leased Corporate and Brand offices, development, sales and reservation centers. These upstream leased assets not included in our reported emissions represent less than 0.4% of real estate under Hilton's operational control and are deemed not relevant.

Downstream transportation and distribution

Evaluation status
Not relevant, explanation provided

Metric tonnes CO2e
0

Emissions calculation methodology

Percentage of emissions calculated using data obtained from suppliers or value chain partners
0

Explanation
Not applicable. Hilton provides guest accommodations and services at the hotel and does not transport or distribute products for sale or use outside of the hotel.

Processing of sold products

Evaluation status
Not relevant, explanation provided

Metric tonnes CO2e
0

Emissions calculation methodology

Percentage of emissions calculated using data obtained from suppliers or value chain partners
0

Explanation
Not applicable. Hilton provides guest accommodations and services at the hotel and does not sell products for processing by others.

Use of sold products

Evaluation status
Not relevant, explanation provided

Metric tonnes CO2e
0

Emissions calculation methodology

Percentage of emissions calculated using data obtained from suppliers or value chain partners
0

Explanation
Not applicable. Hilton does not manufacture or sell products that would generate emissions in the actual use of the product, such as gas-powered equipment.

End of life treatment of sold products

Evaluation status
Not relevant, explanation provided

Metric tonnes CO2e
0

Emissions calculation methodology

Percentage of emissions calculated using data obtained from suppliers or value chain partners
0

Explanation
Not applicable. Hilton provides guest accommodations and services at the hotel and does not sell products for use outside of the hotel as its core business. Any end of life treatment for guest amenities and furniture, fixtures and equipment is handled through the hotel's solid waste management program.

Downstream leased assets

Evaluation status
Not relevant, explanation provided

Metric tonnes CO2e
0

Emissions calculation methodology

Percentage of emissions calculated using data obtained from suppliers or value chain partners
0

Explanation
As a hotel operator and franchisor, Hilton does not own any real estate property that is leased and operated by others. However, many of the full-service hotels have space within the hotel that may be leased and operated by others (retail gift shop, spa, restaurant, etc.). At least 95% of this space is not separately metered and related energy use is already included in our reported Scope 1 and 2 Emissions. Emissions from any excluded leased space within the hotel is deemed insignificant.

Franchises

Evaluation status
Relevant, calculated

Metric tonnes CO2e
3473170

Emissions calculation methodology
The Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standard (Revised Edition). See Section CC7 upload for Scope 1 and 2 emissions factors used.

Percentage of emissions calculated using data obtained from suppliers or value chain partners
79

Explanation
Franchised hotels are an integral part of our business model and environmental footprint. In 2017, 4,507 of 5,211 hotels and timeshare resorts (approximately 84%) were franchised properties. Hilton measures and reports CO2e emissions from franchise hotel operations based on monthly energy consumption reported in LightStay. Since 2012, all Hilton brands have required sustainability measurement and reporting as a brand standard. Reported emissions are based on primary data for approximately 79% of hotels with 2016-2017 monthly energy data entered in LightStay deemed complete, excluding outliers. Annual emissions totals have been extrapolated to include 100% of the total Hilton franchised building area enrolled in LightStay during the 2017 calendar year, using the brand average to estimate annual emissions for hotels with incomplete data and prorated emissions for new hotels.

Investments

Evaluation status
Not relevant, explanation provided

Metric tonnes CO2e
0

Emissions calculation methodology

Percentage of emissions calculated using data obtained from suppliers or value chain partners
0

Explanation
Hilton's investments are primarily in the form of hotel ownership, whether wholly-owned or in joint venture/partnership with others. These emissions have already been included in our reported Scope 1 and Scope 2 emissions.

Other (upstream)

Evaluation status
Not relevant, explanation provided

Metric tonnes CO2e
0

Emissions calculation methodology

Percentage of emissions calculated using data obtained from suppliers or value chain partners
0

Explanation
No other relevant Scope 3 upstream emissions identified.

Other (downstream)

Evaluation status
Not relevant, explanation provided

Metric tonnes CO2e
0

Emissions calculation methodology

Percentage of emissions calculated using data obtained from suppliers or value chain partners
0

Explanation
No other relevant Scope 3 downstream emissions identified.

C6.7

(C6.7) Are carbon dioxide emissions from biologically sequestered carbon relevant to your organization?
No

C6.10

(C6.10) Describe your gross global combined Scope 1 and 2 emissions for the reporting year in metric tons CO2e per unit currency total revenue and provide any additional intensity metrics that are appropriate to your business operations.

Intensity figure
0.00025

Metric numerator (Gross global combined Scope 1 and 2 emissions)
2316706

Metric denominator
unit total revenue

Metric denominator: Unit total
9140000000

Scope 2 figure used
Location-based

% change from previous year
20.7

Direction of change
Decreased

Reason for change
Gross global emissions per USD ($) total revenue decreased by approximately 20.7% due to emission reduction activities and changes in Hilton's financial reporting practices. Per Hilton's 2017 Annual Report and Form 10-K, Item 6. Selected Financial Data, "All periods presented have been restated to reflect the combined results of operations and financial position of Park and HGV as discontinued operations as a result of the spin-offs of these businesses in January 2017." In 2017, Hilton reported restated total revenues of $9,140,000,000, a 23.8% increase over 2016 restated revenues of $7,382,000,000. For comparison purposes, the change from prior year has been calculated using the restated revenues.

Intensity figure
14.21

Metric numerator (Gross global combined Scope 1 and 2 emissions)
2316706

Metric denominator
full time equivalent (FTE) employee

Metric denominator: Unit total
163000

Scope 2 figure used
Location-based

% change from previous year
1.8

Direction of change
Increased

Reason for change
Gross global emissions per full-time equivalent employee increased by approximately 1.8% due to staffing efficiency and reorganization associated with Hilton's spin-off of the Park and HGV operations. In 2017, Hilton reported 163,000 total employees (including employees at corporate offices, owned, managed, leased and timeshare properties worldwide). This represents a 3.6% decrease from the 169,000 employees reported in 2016.

Intensity figure
0.00952

Metric numerator (Gross global combined Scope 1 and 2 emissions)
2316706

Metric denominator
square foot

Metric denominator: Unit total
243396534

Scope 2 figure used
Location-based

% change from previous year
5.5

Direction of change
Decreased

Reason for change
Gross global emissions per square foot decreased by 5.5% per square foot in 2017 due to emissions reduction activities and grid efficiency. The floor area denominator includes 100% of the total floor area of Hilton owned and managed hotel properties in operation and enrolled in LightStay as of December 31, 2017, as well as corporate-owned offices and prorated estimates for new hotels.

C7. Emissions breakdowns

C7.1

(C7.1) Does your organization have greenhouse gas emissions other than carbon dioxide?
Yes

C7.1a

(C7.1a) Break down your total gross global Scope 1 emissions by greenhouse gas type and provide the source of each used greenhouse warming potential (GWP).

Greenhouse gas	Scope 1 emissions (metric tons of CO2e)	GWP Reference
CO2	504831	IPCC Fifth Assessment Report (AR5 – 100 year)
CH4	354	IPCC Fifth Assessment Report (AR5 – 100 year)
N2O	455	IPCC Fifth Assessment Report (AR5 – 100 year)

C7.2

(C7.2) Break down your total gross global Scope 1 emissions by country/region.

Country/Region	Scope 1 emissions (metric tons CO2e)
Americas	229459
Asia Pacific (or JAPA)	142091
Europe, Middle East and Africa (EMEA)	134091

C7.3

(C7.3) Indicate which gross global Scope 1 emissions breakdowns you are able to provide.

By business division

C7.3a

(C7.3a) Break down your total gross global Scope 1 emissions by business division.

Business division	Scope 1 emissions (metric ton CO2e)
Hilton Hotels & Resorts	343817
DoubleTree by Hilton	61890
Embassy Suites by Hilton	20647
Hampton by Hilton	7709
Hilton Garden Inn	8538
Homewood Suites	3205
Conrad Hotels & Resorts	25523
Curio Collection by Hilton	2097
Waldorf Astoria Hotels & Resorts	32214

C7.5

(C7.5) Break down your total gross global Scope 2 emissions by country/region.

Country/Region	Scope 2, location-based (metric tons CO2e)	Scope 2, market-based (metric tons CO2e)	Purchased and consumed electricity, heat, steam or cooling (MWh)	Purchased and consumed low-carbon electricity, heat, steam or cooling accounted in market-based approach (MWh)
Americas	644608	644608	1467022	0
Asia Pacific (or JAPA)	650352	574999	1103034	116937
Europe, Middle East and Africa (EMEA)	516106	508495	1173603	17401

C7.6

(C7.6) Indicate which gross global Scope 2 emissions breakdowns you are able to provide.

By business division

C7.6a

(C7.6a) Break down your total gross global Scope 2 emissions by business division.

Business division	Scope 2, location-based emissions (metric tons CO2e)	Scope 2, market-based emissions (metric tons CO2e)
Hilton Hotels & Resorts	1173541	1116398
DoubleTree by Hilton	238515	214300
Embassy Suites by Hilton	85411	85411
Hampton by Hilton	29318	29318
Hilton Garden Inn	39453	37847
Homewood Suites by Hilton	10148	10148
Conrad Hotels & Resorts	114080	114080
Curio Collection by Hilton	17856	17856
Waldorf Astoria Hotels & Resorts	102744	102744

C7.9

(C7.9) How do your gross global emissions (Scope 1 and 2 combined) for the reporting year compare to those of the previous reporting year?

Decreased

C7.9a

(C7.9a) Identify the reasons for any change in your gross global emissions (Scope 1 and 2 combined) and for each of them specify how your emissions compare to the previous year.

	Change in emissions (metric tons CO2e)	Direction of change	Emissions value (percentage)	Please explain calculation
Change in renewable energy consumption	7520	Decreased	0.32	Gross global emissions decreased by approximately 0.32% due to an increase in renewable electricity procured or generated on-site. (Calculation: 7,520 decrease/2,358,846 prior year gross global emissions x 100). Scope 2 emissions decreased approximately 0.40% with no change in Scope 1 emissions. Nearly all of this change is due to an increase in renewables procurement in 2017 from newly enrolled hotels in China (15/50 hotels reporting renewables procurement through utility were opened after 1/1/2017).
Other emissions reduction activities	57002	Decreased	2.4	Gross global emissions decreased by approximately 2.4% due to emission reduction activities including energy efficiency upgrades and operating practices (Calculation: 57,002 decrease / 2,358,846 prior year gross global emissions x 100). Scope 1 and 2 emissions both decreased by approximately 2.4% over the previous year due to building efficiency and other emissions reduction activities across Hilton-managed properties.
Divestment	0	No change	0	
Acquisitions	72072	Increased	3.1	Gross global emissions increased by approximately 3.1% due to the growth of Hilton's managed portfolio in 2017 (not hotel real estate or business acquisitions). (Calculation: 72,072 increase / 2,358,846 prior year gross global emissions x 100). Scope 1 and 2 emissions both increased by approximately 3.1% over the previous year based on prorated energy use and emissions estimates for new hotels.
Mergers	0	No change	0	
Change in output	0	No change	0	
Change in methodology	57210	Decreased	2.4	Gross global emissions decreased by approximately 2.4% due to grid efficiency and average reductions in 2016-2017 electricity CO2e emissions factors used for each reporting year as per our referenced sources (i.e., eGRID, IEA). (Calculation: 57,210 decrease / 2,358,846 prior year gross global emissions x 100). Scope 2 emissions decreased by approximately 3.1% due to grid efficiency, with no change in Scope 1 emissions.
Change in boundary	0	No change	0	
Change in physical operating conditions	0	No change	0	
Unidentified	0	No change	0	
Other	0	No change	0	

C7.9b

(C7.9b) Are your emissions performance calculations in C7.9 and C7.9a based on a location-based Scope 2 emissions figure or a market-based Scope 2 emissions figure?
Market-based

C8. Energy

C8.1

(C8.1) What percentage of your total operational spend in the reporting year was on energy?
More than 5% but less than or equal to 10%

C8.2

(C8.2) Select which energy-related activities your organization has undertaken.

	Indicate whether your organization undertakes this energy-related activity
Consumption of fuel (excluding feedstocks)	Yes
Consumption of purchased or acquired electricity	Yes
Consumption of purchased or acquired heat	Yes
Consumption of purchased or acquired steam	Yes
Consumption of purchased or acquired cooling	Yes
Generation of electricity, heat, steam, or cooling	Yes

C8.2a

(C8.2a) Report your organization's energy consumption totals (excluding feedstocks) in MWh.

	Heating value	MWh from renewable sources	MWh from non-renewable sources	Total MWh
Consumption of fuel (excluding feedstock)	HHV (higher heating value)	2753	2673317	2676070
Consumption of purchased or acquired electricity	<Not Applicable>	133170	3135974	3269144
Consumption of purchased or acquired heat	<Not Applicable>	0	107819	107819
Consumption of purchased or acquired steam	<Not Applicable>	0	124121	124121
Consumption of purchased or acquired cooling	<Not Applicable>	0	241407	241407
Consumption of self-generated non-fuel renewable energy	<Not Applicable>	1168	<Not Applicable>	1168
Total energy consumption	<Not Applicable>	137091	6282638	6419729

C8.2b

(C8.2b) Select the applications of your organization's consumption of fuel.

	Indicate whether your organization undertakes this fuel application
Consumption of fuel for the generation of electricity	No
Consumption of fuel for the generation of steam	No
Consumption of fuel for the generation of cooling	No
Consumption of fuel for co-generation or tri-generation	Yes

C8.2c

(C8.2c) State how much fuel in MWh your organization has consumed (excluding feedstocks) by fuel type.

Fuels (excluding feedstocks)
Natural Gas

Heating value
LHV (lower heating value)

Total fuel MWh consumed by the organization
2265516

C11. Carbon pricing

C11.1

(C11.1) Are any of your operations or activities regulated by a carbon pricing system (i.e. ETS, Cap & Trade or Carbon Tax)?
Yes

C11.1a

(C11.1a) Select the carbon pricing regulation(s) which impacts your operations.
Other carbon tax, please specify (UK CRC Energy Efficiency Scheme)

C11.1c

(C11.1c) Complete the following table for each of the tax systems in which you participate.

Other carbon tax, please specify

Period start date
April 1 2016

Period end date
March 31 2017

% of emissions covered by tax
4

Total cost of tax paid
2600000

Comment
Currently the primary carbon emissions reporting and pricing scheme that we are subject to is the United Kingdom's CRC Energy Efficiency Scheme. Totals are included for 56 managed properties in the UK under Hilton's operational control.

C11.1d

(C11.1d) What is your strategy for complying with the systems in which you participate or anticipate participating?

Currently the primary carbon emissions reporting and pricing scheme that we are subject to is the United Kingdom's CRC Energy Efficiency Scheme. Hilton UK is required to participate in this scheme as an organization with aggregate energy use that exceeds the minimum threshold. All Hilton managed and franchised properties in the UK are required to participate and must purchase allowances for every ton of carbon they emit. Our EMEA sustainability and operations team members track this data centrally and manage compliance and reporting. In the United Kingdom, the team works with the hotels to focus on targeted emissions reduction projects and educates hotel staff on further environmental efficiency measures.

We have identified other managed hotels with current or planned ETS or carbon tax systems, that are not tracked by Hilton at the corporate level and we are assessing for inclusion in next year's CDP reporting. Our overall strategy for compliance across our global portfolio includes:

(1) Using our proprietary LightStay environmental management systems, we require that our hotels and regional property operations teams: (a) set annual energy reduction goals; (b) monitor progress toward our energy reduction targets at the hotel and regional level; and (c) implement energy improvement projects and best practices that reduce energy use and greenhouse gas emissions.

(2) We also use our portfolio-wide ISO 50001 Energy Management System certification to provide a consistent system focused on continuous improvement across our global enterprise.

(3) We will continue to coordinate with regional property operations teams to capture accurate ETS/carbon tax reporting and compliance data for their hotels at the country/system level.

C11.2

(C11.2) Has your organization originated or purchased any project-based carbon credits within the reporting period?
Yes

C11.3

(C11.3) Does your organization use an internal price on carbon?

Yes

C11.3a

(C11.3a) Provide details of how your organization uses an internal price on carbon.

Objective for implementing an internal carbon price
Navigate GHG regulations
Stakeholder expectations
Change internal behavior
Drive energy efficiency
Drive low-carbon investment
Identify and seize low-carbon opportunities

GHG Scope
Scope 1
Scope 2
Scope 3

Application
We have developed an internal price on carbon as part of our science based target model. This pricing is applicable to our Scope 1, 2 and 3 emissions.

Actual price(s) used (Currency /metric ton)

Variance of price(s) used

Type of internal carbon price
Implicit price

Impact & implication
We use our internal carbon pricing to help us understand the costs and opportunities associated with our Scope 1, 2 and 3 carbon targets, navigate current and future carbon regulations, meet our stakeholder expectations, and change internal behavior (including driving energy efficiency and low-carbon investments/opportunities). We are also considering how we can better leverage our internal price on carbon to stress test investments and engage with our suppliers.

C12. Engagement

C12.1

(C12.1) Do you engage with your value chain on climate-related issues?

Yes, our suppliers
Yes, our customers
Yes, other partners in the value chain

C12.1a

(C12.1a) Provide details of your climate-related supplier engagement strategy.

Type of engagement
Compliance & onboarding

Details of engagement
Code of conduct featuring climate change KPIs

% of suppliers by number
100

% total procurement spend (direct and indirect)
100

% Scope 3 emissions as reported in C6.5
100

Rationale for the coverage of your engagement
Hilton is currently addressing emissions reduction in our supply chain through our Responsible Sourcing Policy and initiatives that encourage the use of products and services that minimize greenhouse gas emissions and other environmental impacts. As part of our 2030 Value Chain Targets, Hilton has committed to (1) create a framework for a collaboration program with top tier suppliers, (2) increase data visibility by incorporating social & environmental criteria in all supplier registration and enquiry process and (3) Encourage suppliers to set goals and validate through an auditing and incentive program. Additionally, we will encourage our suppliers to set science-based targets.

Impact of engagement, including measures of success
Impact of engagement: All Hilton suppliers and service providers are required to comply with Hilton's Responsible Sourcing Policy, which outlines the standards expected of Hilton Worldwide suppliers that sell or seek to sell goods or services to Hilton. Hilton reserves the right to conduct unannounced assessments, audits and inspections of supplier facilities to ensure that reasonable efforts are being taken by our suppliers to operate in a manner consistent with the fundamental principles of this Responsible Sourcing Policy. Violations may lead to disciplinary action, including termination of the supplier relationship for repeated violations or noncompliance. Specific to climate-related impacts, our Commitment to the Environment section of the policy states that: Hilton continually strives to minimize the amount of waste we generate and energy we consume. Our goal is to continually move towards the use of renewable materials and biodegradable substances wherever practicable and financially feasible. As Hilton provides information to its stakeholders on how we effectively manage our environmental performance, we further rely upon our suppliers to provide similar information and work collectively toward this goal. Throughout the term of the relationship, and otherwise at Hilton's request, suppliers are to provide information on its efforts to identify, monitor and minimize the environmental impacts of its operations. Additional climate-related supplier objectives can be found in our upload Responsible Sourcing Policy. Measures of success: As part of our new Travel with Purpose 2030 targets, we have committed to measure the success of our supplier engagement programs by encouraging our suppliers to set goals, and then validate those goals through an auditing and incentive program. We are working with our Supply Management team to define the exact processes that will be implemented for this program.

Comment

Type of engagement
Innovation & collaboration (changing markets)

Details of engagement
Run a campaign to encourage innovation to reduce climate impacts on products and services

% of suppliers by number
30

% total procurement spend (direct and indirect)
30

% Scope 3 emissions as reported in C6.5
30

Rationale for the coverage of your engagement
While we do not have an exact figure, we estimate that currently approximately 30% of our procurement spend is on innovative solutions that reduce our environmental footprint. This includes products and equipment designed to reduce consumption of energy, water and waste across our managed hotels, and products that reduce our Scope 1, 2 and 3 emissions.

Impact of engagement, including measures of success
Impact of engagement: We continually seek to work with suppliers that collaborate with us to provide innovative solutions to reducing our environmental impact, including our carbon impact. For example, we recently began working with a company that manufacturers laundry machines that can save up to 80% of the water, 50% of the energy, and 50% of the chemical detergents used by a conventional commercial laundry machine. Partners such as this company receive our business because their products and services align with our company's goals to reduce our environmental impact. By working with partners whose business

priorities align with our own, we are able to help change the market for sustainable products in the hospitality industry. Measures of success: Success of this type of supplier engagement is measured by the environmental savings that we are able to achieve in partnership with our suppliers. Impact, such as reduction in carbon, energy, water and waste, is directly monitored through LightStay.

Comment

C12.1b

(C12.1b) Give details of your climate-related engagement strategy with your customers.

Type of engagement
Education/information sharing

Details of engagement
Run an engagement campaign to educate customers about the climate change impacts of (using) your products, goods, and/or services

Size of engagement
100

% Scope 3 emissions as reported in C6.5
0

Please explain the rationale for selecting this group of customers and scope of engagement
Please note that emissions from our hotel guests' energy use during their stay at our managed hotels are already included in our reported Scope 1 and 2 emissions, and are not accounted for in our Scope 3 emissions. Rationale: Our guests can have a measurable impact in reducing our hotels' Scope 1 and 2 emissions (as well as water, waste and other impacts) if they are considerate about their energy use during their stay. Scope of engagement: As a global company welcoming nearly 250 million guests each year, our goal is to educate and encourage our guests to conserve resources and to support our sustainability efforts. We are continually identifying new ways to engage with our guests around our environmental impacts, including around our science-based targets. We believe that many guests will take this knowledge with them to reduce their carbon footprint at home and at work.

Impact of engagement, including measures of success
Impact of engagement: In 2017, Hilton completed the following climate-related guest engagement activities with beneficial outcomes: (1) Rolled out globally the integration of hotel-specific Travel with Purpose performance data on the Wifi login landing page, available to all guests and visitors who sign into hotels' Wifi; (2) Released the 'Steve Matters' video, co-developed with Coca-Cola to raise awareness about water stewardship. We are planning to roll out this video on guest room TVs as part of our external communications in 2019; (3) Eliminated plastic bottles in all meetings, events, gyms and spas in China in response to guests' feedback; (4) Saved energy, water and waste in the U.S. by using "room ready" linens through our Conserve to Preserve program; and (5) 450 hotels offer Meet with Purpose globally, for sustainable conference and event options that reduce their energy, water and waste impacts. Hilton gathered feedback from customers and sales teams to identify the most pressing sustainability issues for meetings and events. Measures of success: Success will be measured based on energy, water and waste saved through our Conserve to Preserve program and Meet with Purpose programs. Also, we will be monitoring guest engagement in supporting responsible travel in destination hot spots, which is a new metric that we will be tracking to support our 2030 Travel with Purpose Value Chain Targets.

C12.1c

(C12.1c) Give details of your climate-related engagement strategy with other partners in the value chain.

Franchised hotels, defined within CDP as "other partners in the value chain", are an integral part of our business model and environmental footprint. In 2017, 4,507 of 5,211 hotels and timeshare resorts (approximately 84%) were franchised properties. Hilton measures and reports CO2e emissions from franchised hotel operations based on monthly energy consumption reported in LightStay.

Engagement strategy: We use LightStay and our Brand Standards to engage, educate and help drive sustainability performance across our franchised hotels to make the greatest impact, as follows:

(1) On a company-wide basis, we prioritize activities that can be scaled up to include franchised properties, and those that will create the greatest value for all hotels and their owners.

(2) At Hilton, sustainability measurement and continuous improvement is a Brand Standard for all hotels, managed and franchised. Using our LightStay platform, all hotels are required to report monthly utilities including energy, water and waste; set annual reduction targets; maintain active energy, water and waste improvement projects; and complete benchmarking surveys across all operating departments, consisting of over 200 sustainability best practices and performance indicators.

(3) Hilton has committed to ISO as a global standard and our entire portfolio (owned, managed and franchised hotels) is certified to three ISO Standards: ISO 9001 (Quality Management), ISO 14001 (Environmental Management) and ISO 50001 (Energy Management).

C12.3

(C12.3) Do you engage in activities that could either directly or indirectly influence public policy on climate-related issues through any of the following?
Direct engagement with policy makers
Trade associations
Funding research organizations
Other

C12.3a

(C12.3a) On what issues have you been engaging directly with policy makers?

Focus of legislation	Corporate position	Details of engagement	Proposed legislative solution
Other, please specify (WTTC Global Climate Change Accord)	Support	Under our CEO's leadership as chairman of the World Travel and Tourism Council (WTTC), a common agenda between the WTTC and the UN Framework Convention on Climate Change has been developed in advance of the upcoming COP24 meetings in Poland. Citing the need to transform dialogue into action, our CEO has advocated for the industry to exceed its 30% reduction target by 2020.	The WTTC and the UN Framework Convention on Climate Change will work to achieve carbon neutrality and reduce the contribution of the travel and tourism industry to climate change and support quantitative industry targets and reductions, including science-based targets.

C12.3b

(C12.3b) Are you on the board of any trade associations or do you provide funding beyond membership?
Yes

C12.3c

(C12.3c) Enter the details of those trade associations that are likely to take a position on climate change legislation.

Trade association
World Travel and Tourism Council (WTTC)

Is your position on climate change consistent with theirs?
Consistent

Please explain the trade association's position
The WTTC works to raise awareness of travel and tourism as one of the world's largest industries. The WTTC Climate Change Task Force works to identify industry priority action areas for the future and to evaluate industry progress against climate change commitments.

How have you, or are you attempting to, influence the position?
In 2017, our Chief Executive Officer was elected to serve as the WTTC's Chairman for the next two years. Under our CEO's leadership, a common agenda between the WTTC and the UN Framework Convention on Climate Change has been developed in advance of the upcoming COP24 meetings in Poland. Citing the need to transform dialogue into action, our CEO has advocated for the industry to exceed its 30% reduction target by 2020.

Trade association
American Hotel and Lodging Association (AHLA)

Is your position on climate change consistent with theirs?
Consistent

Please explain the trade association's position
To advocate, communicate and educate on behalf of the lodging industry in order to create business value through sustainability strategies defined as social responsibility and environmental protection. From a public advocacy perspective, this group aims to identify sustainability legislative ideas and develop industry position and work with the U.S. General Services Administration on its federal travel program policies.

How have you, or are you attempting to, influence the position?
Hilton is a member of the American Hotel and Lodging Association (AHLA) and chairs the AHLA's Sustainability Committee, which focuses on environment, engineering and corporate responsibility for the hotel and lodging industry. Our Executive Vice President, Global Brands, serves on the Board of Directors and the Executive Committee of the AHLA.

Trade association
International Tourism Partnership (ITP)

Is your position on climate change consistent with theirs?
Consistent

Please explain the trade association's position
The International Tourism Partnership (ITP) brings together the world's leading international hotel companies to provide a voice for environmental and social responsibility in the industry.

How have you, or are you attempting to, influence the position?
Hilton is a founding member of this travel industry consortium and participates in various working groups, including the Hotel Carbon Measurement Initiative, the Hotel Water Measurement Initiative, and the Youth Career Initiative. in 2017, we co-created and supported the launch of the ITP's goals on carbon, water, youth and human rights. We also assisted with the creation of the Water Stewardship for Hotel Companies manual, which was published in March 2018.

C12.3d

(C12.3d) Do you publicly disclose a list of all research organizations that you fund?
Yes

C12.3e

(C12.3e) Provide details of the other engagement activities that you undertake.

Since 2012, Hilton has been a signatory to the United Nations (UN) Global Compact, a voluntary initiative based on a CEO-led commitment to implement ten sustainability principles supporting the goals of the UN. In 2017, Hilton participated in the following UN initiatives that directly relate to our climate change strategy and 2030 Travel with Purpose Value Chain targets: (1) Signed the United Nations CEO Water Mandate, demonstrating our commitment to furthering the global dialogue on water stewardship. (2) Served as an official partner for the UN World Tourism Organization (UNWTO)'s International Year of Sustainable Development. (3) Aligned our corporate responsibility strategies and objectives to support the UN Sustainable Development Goals.

C12.3f

(C12.3f) What processes do you have in place to ensure that all of your direct and indirect activities that influence policy are consistent with your overall climate change strategy?

Since 2012, Hilton has been a signatory to the United Nations (UN) Global Compact, a voluntary initiative based on a CEO-led commitment to implement ten sustainability principles supporting the goals of the UN. We have also aligned our corporate responsibility strategies and objectives to support the UN Sustainable Development Goals – a global framework for coordinated action to address critical topics by 2030.

The Vice President of Sustainability has oversight responsibility for indirect and indirect activities to ensure consistency with Hilton's sustainability principles and climate change strategy. All direct and indirect activities that influence policy are conducted by Hilton's corporate responsibility staff, along with regional sustainability managers and regional VPs of Property Operations, who are most familiar with Hilton's overall climate change strategy. Regular meetings and ongoing communications between the Corporate Responsibility team and global regions are conducted to track sustainability activities inside and outside of the Hilton organization.

C12.4

(C12.4) Have you published information about your organization's response to climate change and GHG emissions performance for this reporting year in places other than in your CDP response? If so, please attach the publication(s).

Publication
In mainstream reports, in accordance with TCFD recommendation AND in line with CDSB framework

Please note: *Our 2018 CDP Reporting Boundary is Operational Control, defined as companies, entities or groups over which operational control is exercised.   It is important to note that this represents a change from last year's reporting where Hilton has expanded its reporting boundary to include water consumption data for both managed and franchised hotels. This change was made in an effort to ensure consistency with our DJSI reporting and annual sustainability results published for our global portfolio. However, this caused other reporting inconsistencies and issues with the level of operational control and detailed data available for our franchised properties. Therefore, we have returned to the Operational Control Boundary for CDP reporting on Climate Change, Water and Forests to ensure consistency.   However, please note that Hilton's corporate responsibility and water stewardship strategies, along with LightStay requirements for measurement and improvement in water efficiency, extend to all managed and franchised hotels globally.*

SC. Supply chain module

SC0.0

(SC0.0) If you would like to do so, please provide a separate introduction to this module.

Hilton is one of the largest and fastest growing hospitality companies in the world, with 5,284 properties comprising 856,115 rooms in 105 countries and territories as of December 31, 2017. Managed and franchised hotels included in this disclosure include: our luxury and lifestyle hotel brands, Waldorf Astoria Hotels & Resorts, Conrad Hotels & Resorts and Canopy by Hilton; our full service hotel brands, Hilton Hotels & Resorts, Curio - A Collection by Hilton, DoubleTree by Hilton, Tapestry Collection by Hilton and Embassy Suites by Hilton; our focused service hotel brands, Hilton Garden Inn, Hampton by Hilton, Tru by Hilton, Homewood Suites by Hilton and Home2 Suites by Hilton. In addition to our current hotel portfolio, we are focused on the growth of our business through expanding our share of the global lodging industry through our development pipeline. During the year ending December 31, 2017, nearly 108,000 new rooms were approved for development, and we opened 399 hotels consisting of over 59,000 rooms.

We depend on our long-term hotel management and franchise contracts with third-party owners and franchisees for the majority of our fee revenues. The management and franchise segment includes all of the hotels we manage for third-party owners, as well as all franchised hotels owned and managed by others. As of December 31, 2017, there was a total of 729 hotels managed by Hilton within the owned and managed global regions ("managed hotels"). Out of these hotels, Hilton has an ownership interest in 73 hotels (10% owned, joint venture, leased) and a 100% controlling interest in only four hotels, accounting for less than 1% of the total managed portfolio under Hilton's operational control ("Direct Operations"). Franchised properties, which are controlled by Hilton's development and operating standards for the respective Brands, account for over 73% of our global portfolio by total room count. Given their significance to Hilton's business model, responses that are relevant to franchised hotels are reported as Other Value Chain.

Our 2018 CDP Reporting Boundary is Operational Control, defined as companies, entities or groups over which operational control is exercised.   It is important to note that this represents a change from last year's reporting where Hilton has expanded its reporting boundary to include water consumption data for both managed and franchised hotels. This change was made in an effort to ensure consistency with our DJSI reporting and annual sustainability results published for our global portfolio. However, this caused other reporting inconsistencies and issues with the level of operational control and detailed data available for our franchised properties. Therefore, we have returned to the Operational Control Boundary for CDP reporting on Climate Change, Water and Forests to ensure consistency.   However, please note that Hilton's corporate responsibility strategy, along with LightStay requirements for measurement and improvement in energy efficiency and emissions reduction, extend to all managed and franchised hotels globally.

Hilton has integrated energy and climate-related issues into our business objectives for years through our continual focus on improving the environmental performance of our hotels and driving responsible travel and tourism across our industry. We are serious about our role in helping the international community reach the UN Sustainable Development Goals (SDGs) through our global hotel operations and supply chain footprint. Our corporate responsibility strategy, Travel with Purpose, drives us to think and act in ways that will maximize our contributions to help meet these important global goals. In this spirit, we have united our 380,000 Team Members along with our owners, partners and communities in more than 100 countries around our corporate responsibility strategy and shared goals.

Earlier this year, we released our new Travel with Purpose long-term commitment to double our social impact and cut our environmental footprint in half by 2030. One of the key targets underpinning these goals is our new science-based targets (SBTs), demonstrating our commitment to reducing our carbon emissions in line with the stipulations of the Paris Agreement. We believe that climate change is one of the biggest threats to business today, and we are proud to be the first major hotel company to have our SBTs approved by the Science Based Targets initiative (SBTi).

SC0.1

(SC0.1) What is your company's annual revenue for the stated reporting period?

	Annual Revenue
Row 1	9140000000

SC0.2

(SC0.2) Do you have an ISIN for your company that you would be willing to share with CDP?
No

SC1.1

(SC1.1) Allocate your emissions to your customers listed below according to the goods or services you have sold them in this reporting period.
